

Today's Highlight

Describing steps in a process

We use first, next, then, after that (etc) to describe the order of actions.	First , do...	To start , do...
	After that ,...	Next ,...
	Then , ...	
	Secondly , ...	Thirdly ,
	Finally , ...	To Finish , ...

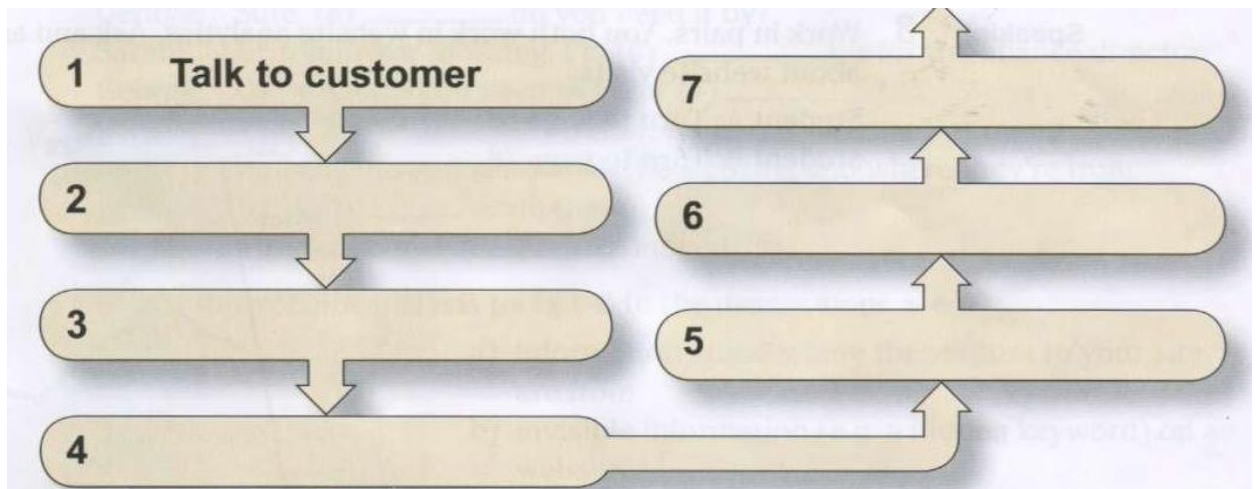

1. Complete this text with the words in the box.

After that	Finally	First	Next	Secondly	Then	Thirdly
------------	---------	-------	------	----------	------	---------

The steps in website development

(1) First , discuss w i t h the customer their requirements and the target audience. Find out what features and number of pages they want on their site. (2) Secondly, analyze the information from the customer. (3)Thirdly, create a website specification. (4) Next, design and develop the website. (5) After that, assign a specialist to write the website content. (6) Then, give the project to programmers for HTML coding. (7) Finnally, test the website. After you publish the website, update and maintain it on an ongoing basis. Monitor customer use.

2. Complete the flowchart to show the website development process. (Refer to the reading text in Number 1 above)

beautiful well-designed easy-to-use/navigate clear reliable
useful informative fun funny exciting interesting

It's a YouTube. There is no day without YouTube because you know what, in YouTube i can get many things. Like a education, funny videos, sports, and many more. YouTube have a beautiful design too, and than easy to use. I start using YouTube when i was a children and i'm always looking for a sports, and games videos. But when i was teenager i like to see a music videos and mentoring videos. Thats great and i like it.
